September 2021

Dear Parent/Carer

On Thursday 21 October all Year 8 students will be taking part in a range of STEM activities as a part of the Alternative Curriculum day. The aim of these activities is to highlight the importance of scientific, technological, engineering and mathematical skills when solving problems and designing products.

The day will consist of half a day studying the structural properties of bridges as we walk along the Ouse and half a day based in school completing challenges that will test students' mathematical and programming skills.

All students will need to be in school uniform for the day and although we are hoping for good weather, please ensure that students have a suitable coat or waterproof for the bridge study if the weather requires one.

All students have access to our extra-curricular activities and reasonable adjustments will be made to ensure each student's full inclusion in this trip. Please contact Ms Mehta, if you think that this may be needed for your child.

Please would you give permission for your son/daughter to attend the trip by clicking on the following link?

Yours faithfully

Alan Jobson
